

# Heavy Duty Channel Outdoor Blinds

ROBUST

DURABLE

STURDY

**3-5 WEEK  
TURNAROUND**  
(FROM FINAL CHECK MEASURE)

## Experience Unbeatable Durability And Protection

Shut It's Heavy Duty Channel Blind is specifically engineered to span larger openings with its enhanced strength, achieved through reinforced top and bottom tubes and heavy-duty side channels.

Its user-friendly design allows for easy crank handle operation, enabling you to secure it at predetermined positions. Additionally, you have the option of motorisation for added convenience.

The channels come in four standard colours, while the bottom rails are offered in five standard colours, with the option to powder coat them in a custom colour for an additional cost. This blind also provides the ability to pre-select fixed locking points during installation. After securing it with stainless steel locking pins, you can tension the blind using the crank.

It's important to note that the channels serve only as a guide and do not provide weather protection. The fabric is not sewn or welded into the side channels; therefore, it is strongly recommended to retract outdoor blinds in high winds and during storms to ensure their longevity and performance.
