Constructed With Sturdy, Weather-Resistant Aluminium.

Revitalise your home with the modern and seamless design of Aluminium Privacy Screens, a versatile addition that adds both style and value.

These screens are perfect for various applications, from screening and fencing to gateways and decorative architectural accents. Say goodbye to the limitations of timber, as aluminium offers enduring, weather-resistant qualities that ensure your screens won't splinter, flake, peel, corrode, discolour, or warp.

Whether you choose horizontal or vertical installation, the 65mm elliptical slats provide flexibility, with options for 10mm or 20mm spacing or a 30° fixed louvre for precise customisation.

You have the creative freedom to mix and match frame and slat colours, allowing you to personalise your screen to complement your homes decor seamlessly.

Our extensive colour range includes popular options and woodgrain finishes that emulate the warm look of timber without the need for constant upkeep.

Plus, we offer special powder coat colours to elevate your design and make a statement.
